

**Claims**

1. A medicine pack, comprising a plurality of blister units, said blister units each having a protective case, with a blister strip located therein, the blister strip being fixedly connected to the protective case, and the protective case being able to be unfolded or opened out, and also, if appropriate, an outer package for receiving the blister units.
2. A medicine pack, comprising a plurality of blister units, said blister units each having a protective case, with a blister strip located therein, the blister strip being fixedly connected to the protective case, the protective case being able to be unfolded or opened out, and also an outer package for receiving the blister units, the outer package being configured in such a way that the pack content can be fixed in the inside of the outer package.
3. The medicine pack as claimed in claim 2, wherein the outer package is composed of a plurality of individual parts not connected to one another.
4. The medicine pack as claimed in claim 3, wherein the outer package is made up of an open base box and a clamp sleeve.
5. The medicine pack as claimed in claim 2, wherein the outer package is equipped with a device for reclosing the outer package.
6. The medicine pack as claimed in claim 2, wherein the outer package has a device for reclosing the outer package, and this device for reclosing the outer package is connected to the outer package in such a way that this device for reclosing the outer package can be separated from the rest of the outer package.
7. The medicine pack as claimed in claim 2, wherein the outer package has a device for reclosing the outer package, and this device for reclosing the outer package has a hinged lid, a hinged sleeve or a sealing strap.
8. The medicine pack as claimed in claim 2, wherein the outer package has, in the inside, a means for retention of the pack content.
9. The medicine pack as claimed in claim 2, wherein the outer package has resilient tabs in the inside.
10. The medicine pack as claimed in claim 2, wherein the outer package has a base box with resilient tabs.

11. The medicine pack as claimed in claim 5, 6 or 7, wherein the outer package has a base box with resilient tabs.
12. The medicine pack as claimed in one of the preceding claims, wherein the blister units are connected detachably to one another and can be folded together so that, when folded together, the individual blister units come to be coplanar with respect to one another.
13. The medicine pack as claimed in claim 11, wherein the medicine pack has three or six blister units, in each case with five blister cavities, or the medicine pack has two or four blister units, in each case with seven blister cavities.
14. The medicine pack as claimed in one of the preceding claims, wherein a transparent film encloses the entire medicine pack.
15. A medicine pack comprising a plurality of blister units, said blister units each having a protective case, with a blister strip located therein, the blister strip being fixedly connected to the protective case, the protective case being able to be unfolded or opened out, and also an outer package for receiving the blister units, the outer package having a device for reclosing the outer package and a film as wrapper.
16. A medicine pack comprising a plurality of blister units, said blister units each having a protective case, with a blister strip located therein, the blister strip being fixedly connected to the protective case, the protective case being able to be unfolded or opened out, and also an outer package for receiving the blister units, the outer package having a base box with resilient tabs and a film as wrapper.
17. A medicine pack comprising a plurality of blister units, said blister units each having a protective case, with a blister strip located therein, the blister strip being fixedly connected to the protective case, the protective case being able to be unfolded or opened out, and also an outer package for receiving the blister units, the outer package having a base box with resilient tabs, a device for reclosing the outer package, and a film as wrapper.
18. A medicine pack comprising a plurality of blister units, said blister units each having a protective case, with a blister strip located therein, the blister strip being fixedly connected to the protective case, and the protective case being able to be unfolded or opened out, and also an outer package for receiving the blister units, the outer package having a base box with resil-

ient tabs, a device for reclosing the outer package, which can be detached from the rest of the outer package, and a film as wrapper.

19. The medicine pack as claimed in one of the preceding claims, containing a leaflet with the patient information and/or directions for use.
